

SALT RIVER HIGH FOOD GARDEN

A new garden at Salt River High

We assisted Salt River High with their Dignity Programme. We organised a truck load of compost, made growing beds, and offered guidance for their first planting session. Principal Mr Nicholas is a legend!

Kipling Street Food Garden

A clean up, new mulch and seed planting

Before the summer heat hits we needed to cover the garden with new mulch. And of course, it's spring, so we did a seed planting session!

Chatam Community Garden

The Water Tower

We have a total of 2400 l new water storage, which will help get us through summer. As we are very exposed on the field, Jonathan's ingenious system of welding the tank into the ground and a metal box keep all plumbing parts and our water safe! More cool stuff to come Stay tuned.

Chatam Community Garden

Compost Loading Bay

We finished the Tyre Compost Bay for deliveries of compost, woodchip and other organic matter.

Chatam Community Garden

A mole snake

Snakes are important for the garden and we welcome them! All snakes we have found here so far are not venomous and are not dangerous for humans!

Chatam Community Garden

Interesting harvest

Seasonal eating and diversity is key to good health.

Salt River Nature Park

Spring, mulch, more signs and a market

The garden is showing off with spring flowers! Wow! Only 2 1/2 years after the start this is phenomenal! Snowy made a couple of more signs and covered the garden in mulch. And then ... a Heritage Market - lovely!
