

Chatam Community Garden

Tree Planting Day

We planted 2 pear trees and 2 apple trees.

Chatam Community Garden

Veggie Harvesting Day

We harvested veggies together. All kids and some neighbours got to take home a bunch of fresh greens.

Chatam Community Garden

Serruria foeniculacae

These are part of the Protea family and are critically endangered. We planted 5 of them end of June '21. Now, signs of new growth, hooray!

Salt River Nature Park

Erica verticillata

E. verticillata is extinct in the wild and we are part of a program to help make it popular in urban gardens. This will help increasing its numbers and stabilise the population. Our plant looked a little weak, so we were advised to feed organic Seagro fertilizer for a few weeks until it looks stronger.

Salt River Nature Park

New Opening Times and Sign Making

Snowy our neighbour of the garden, has agreed to open the garden twice a week and do some activities with the neighbourhood kids. Very exciting to see some new signs in the making. Also its spring time :)
